

SUMMARY

Solution-driven software developer with a desire for creating appealing, friendly, and responsive user interfaces. Developed a mobile-first portfolio app, an API-served world-wide weather app, and a fully functional mobile app to promote positivity during the Covid pandemic. Passionate about web and mobile application architecture, as well as exploring existing software systems.

EDUCATION

Bachelor Degree: Computer Science
University of Maryland, College Park, MD
2017 to 2021

SOFT SKILLS

► LeaderShip ► Communication ► Customer Service
► Problem Solving ► Critical thinking ► Work Ethic
► Organization

PERSONAL PROJECTS

1 Personalized mobile-first Portfolio

➡ Created a publicly-hosted web-app designed to share employment relevant details about myself, in addition to cataloging several programming projects.

2 Global API-Powered Weather Web Application

➡ Created a functional live weather application built on a backend powered by the Google Places, AWS Lambda, and Open Weather API's.

3 Kind Words Android Application

➡ Worked with a team to create a letter exchange app that lets users write anonymous letters to each other, expressing their struggles, fears, and offering words of encouragement, during the covid pandemic.
